

## FURminator Deshedding Tool

The FURminator's unique blade is designed to remove loose hair like no other. Users like the FURminator because it removes the thick undercoat hair from dogs and cats while leaving the shiny top coat intact and healthy. This unique grooming brush is specially designed to dramatically reduce the mess and clean up of unwanted pet hair.

### FURminator

This grooming tool can reduce shedding up to 60-90%. The pet's undercoat can become a dense mess of loose, dead hair that is often the major source of shedding. The FURminator was developed to grab and remove—not cut, but remove—undercoat hair quickly and easily, leaving the topcoat shiny and undamaged. Your pet will enjoy the feeling the tool provides and you will love seeing less hair. Comes in three sizes and can be used on both dogs and cats. Available in small, medium & large.

*NOTE: Not recommended for the following dog breeds: American Water Spaniel, Bedlington Terrier, Bichon Frise, Chinese Crested, Glen of Imaal Terrier, Havanese, Irish Water Spaniel, Japanese Chin, Komondor, Lhasa Apso (depends on the coat texture), Löwchen, Maltese, Pekingese (depends on the coat texture), Poodle, Portuguese Water Dog, Puli, Saluki, Shih Tzu (depends on the coat texture), Silky Terrier, Soft Coated Wheaten Terrier, Tibetan Spaniel (depends on the coat texture), Yorkshire Terrier (depends on the coat texture).*
