

ScatMat Pet Proofing Solution

Keep your pet off of furniture and counters. The ScatMat works immediately, giving your pet a mild stimulation at the time of the pet's mischief. Animals quickly learn to avoid areas protected by ScatMat.

ScatMat

Unlike training devices that rely on audible alarms, ScatMat affects only the animal that makes contact with it and has no effect on other pets or people in the house. ScatMat adjusts to three corrective levels. After one or two encounters, your pet will associate the stimulations with the location where his mischief occurred and avoid those locations.

Features:

- Trains your pet to avoid areas such as tables and chairs
- Your pet receives a correction upon contact with the mat
- Three levels of correction and On-Off button
- 12 inch by 60 inch size
- Uses 9-volt alkaline battery (not included)
- Lifetime Limited Warranty
